

# Rhodes Wellness College

## Professional Integrative Nutrition Diploma

### Introduction

Until now there have been colleges in B.C. that effectively train nutritionists, and colleges that effectively train counsellors. There are no colleges that bring the two together. Yet the need to provide a bridge between the two has long existed. Graduates that complete nutrition-only programs report difficulty when trying to help clients overcome issues that branch into non-nutrition areas. Depression, addiction, past physical trauma, and other challenges that are commonplace in today's world, make it difficult to motivate individuals to make nutritional changes that will benefit their health. Similarly, nutrition has a profound effect on individual's sense of emotional, mental, physical and spiritual well-being. Counsellors that ignore this area are not utilizing every potential tool to help their clients.

**Graduates from Rhodes Wellness College's Professional Integrative Nutrition Program will have the advantage of being in a position to apply for jobs from two sectors – both the front lines of mental health, emotional health, and addiction recovery as well as the front lines of nutritional wellness thereby increasing their career prospects upon graduation.**

**Graduates will also be able to register with both the International Coach Federation and the Health Coach Alliance (pending) to receive potentially both their *Associate Certified Coach* certification and their *Registered Health and Nutrition Counsellor* designation.**

This is an exciting time for those that are wanting to specialize in the area of nutrition. The general public's interest in what we eat, how we grow, prepare, and consume our food, and how it impacts our well-being has never been greater. We feel it is crucial to provide a program that will not just meet this growing interest, but a program that can provide leadership, guidance, coaching, counselling, knowledge, and support to this crucial aspect that drives our very existence. We believe this program accomplishes all of that and invite you to investigate what this program can do for you.

If you are an individual without formal training in either nutrition or counselling, or an individual with some knowledge already in these areas wanting to upgrade your skills and gain a credential, this program will help you acquire the skills and knowledge to work in the industry for an organization or to open up a private practice.

If you are a counsellor who wants to upgrade your knowledge and skills in the area of nutrition and receive additional designation or if you are a nutritionist who wishes to increase your coaching and counselling knowledge and skills there are many aspects of this program that will help you.

We invite you to speak with one of our Admissions Advisors today to learn more information on how you can become a Registered Health and Nutrition Counsellor (RHNC) through Rhodes Wellness College.

I wish you the very best in your pursuit of personal betterment and in your quest to help others.

Sincerely,

Ben Colling, MA Leadership  
President, Rhodes Wellness College

## Professional Integrative Nutrition Diploma

### PROGRAM OUTLINE

**Program Title:** Professional Integrative Nutrition Diploma  
**Program Length:** 78 weeks (1740 hours)  
**Program Type:** Career Training/Academic  
**Career Occupation:** Professional Integrative Nutritional Counsellor  
**Program Prerequisites:** *Must meet Rhodes Wellness College Ltd. admission requirements.*

#### Program Description

The Integrative Health & Nutrition Diploma is a comprehensive program that combines theory with practical and experiential learning and is designed for those who want to gain expertise in providing nutritional coaching and counselling services for both the private and public sector or open an individual practice in nutritional counselling and coaching. The program will lead to certifications in both life skills coaching and integrative nutritional counselling. The experience will be practical and transformative. This program will prepare them to honestly and effectively communicate with themselves, their peers, and eventually their clients as they learn and practice wellness and nutrition coaching and counselling.

Students will initially learn how to effectively mentor individuals and groups through coaching. They will then be introduced to the theories and techniques of wellness and will practice applying these techniques in their own lives. They will be guided to analyze and reflect on the effect these techniques have on themselves and their classmates. After personally experiencing wellness-related techniques, students will learn the fundamental theories and application of these techniques as they gain a deeper understanding of how to help individuals in the emotional, mental, physical, and spiritual aspects of wellness. While exploring physical wellness theories, students will begin to learn the fundamentals of nutrition and its effects on individuals.

Having gone through the first half of the program that features coaching, self-development and acquiring base knowledge in counselling and nutrition, in the second half of the program students will focus on mastering all of the academic requirements necessary for them to qualify to become a Registered Health & Nutrition Counsellor (RHNC) through the Canadian Health Coach Alliance (see <https://www.healthcoachalliance.ca/schools.html> for more details).

This integrative program allows graduates to work in a wide array of industries: from the food, wellness, and health industries to private practice in the nutrition and coaching industry. Graduates will be able to work as Nutrition Educators, Nutrition Consultants, Wellness Managers, Wellness Counsellors, and Life Coaches. They will be able to work in various sales and customer consulting positions at Nutrition stores, in outreach centres and recovery centres, as holistic nutritionists, and will also have the option to work in private and semi-private practice, either on their own or with a group of other wellness-related counsellors.

---

#### Program Learning Objectives

This program provides comprehensive training in personal and group coaching, basic counselling, personal wellness development, and a specialized nutrition-focused curriculum that promotes individual health and well-being. Upon completion, students will be qualified to provide nutritional assessments, conduct intake interviews, maintain case files, session notes, and provides nutritional counselling along with life skills

# Rhodes Wellness College

## Professional Integrative Nutrition Diploma

coaching. Graduates will be qualified to register with both the International Coach Federation (ICF) working towards their credentials as an Associate Certified Coach (ACC) and as a Professional Certified Coach (PCC). They will also be eligible to register with The Health Coach Alliance (HCA), pending HCA approval of this program, and receive the designation of “Registered Health & Nutrition Counsellor™”.

By the end of the program, students will be able to provide the following services:

- Apply coaching and nutrition theory with a variety of population types
- Provide comprehensive nutrition and lifestyle assessment and coaching to clients
- Develop and evaluate nutrition assessment forms
- Assist individuals to improve their health through nutrition and lifestyle recommendations
- Develop meal plans according to client goals
- Assist individuals to recognize obstacles in their personal life preventing good health, and teach habit-changing methods to reach wellness and lifestyle goals
- Facilitate life skills workshops
- Facilitate nutrition and wellness workshops
- Provide individual goals-based success coaching
- Provide individual nutrition coaching and consulting
- Demonstrate an understanding of the difference between coaching and counselling and which technique is more likely to be effective, according to client’s needs, goals, and circumstances
- Provide nutritional recommendations and wellness plans for clients
- Provide individual and group nutritional consulting and education
- Demonstrate competency in a range of presentation strategies
- Demonstrate knowledge of ethics pertaining to nutrition counselling and coaching
- Understand their requisite scope of practice and why it is crucial to never practice beyond their scope as coaches and health & nutrition counsellors.

### Program Format

This program includes a variety of teaching methods that coincide with diverse learning styles and the skills required for employment as a coaching and wellness professional. The training is conducted in a group setting to maximize input from students. Small class sizes (e.g. 30 or less students) will enable instructors to provide students with consistent individual feedback and attention.

Specific instructional methods include the following:

1. Lectures
2. Role plays
3. Instructor demonstrations
4. Writing
5. Readings
6. Group discussions
7. Group on group analysis
8. Consultation sessions with the instructor(s)

### Program Readings

A variety of materials including e-books, articles, readings, course notes, and other resources will be utilized to support each course. Specific suggestions are detailed below.

# Rhodes Wellness College

## Professional Integrative Nutrition Diploma

### **Program Evaluation and Completion Requirements:**

This program is evaluated by a variety of means including written and oral examinations, papers, and supervised fieldwork. Participants must receive a minimum of a passing grade on each course during the first half of the program (the first three semesters), and a minimum of a 60% overall average in the nutrition-based semesters (the last three semesters) in order to receive their Professional Integrative Nutrition Diploma. All assignments in all courses must be completed. If a participant does not receive a passing grade or does not complete all assignments in each course, they will not be able to proceed to the following semester. In accordance to Rhodes Wellness College's Student Handbook, students will be permitted to retake any test once, however, if they do not pass in their second attempt, they will be required to retake the course and pass it in order to proceed to the next semester.

### **Grading system:**

Students must complete all course requirements in order to receive credit for each course. The student's final grade will be based on the following grade distribution:

A+: 95% or higher	A: 90 - 94%	A-: 85 - 89%
B+: 80 - 84%	B: 75 - 79%	B-: 70 - 74%
C+: 65 - 69%	C: 60 - 64%	C- : 55 - 59%
P (Pass): 50 - 54%		
NC (No Credit): 0 - 49%		

### **Program Organization, Hours, and Flow**

#### **Semester 1: Coaching**

##### **12 weeks (270 hours)**

COAC 100 Professional Life Coaching (135 hours: 6 weeks)

COAC 101 Life Skills Facilitation & Coaching (135 hours: 6 weeks)

NUTR 280 Nutrition for Advanced Ages (45 hours: 2 weeks)

PROF 230 Professional Practice and Business (45 hours: 2 weeks)

### **Additional Requirement: PRAC 101 Supervised Practicum**

**(120 hours total. Students will have 6 weeks maximum to complete)**

Students can choose from a wide array of practicum placements from holistic eateries, integrative pharmacies, fitness centers, integrative wellness clinics, nutrition and supplement stores, community centers, and more. Students are given support and encouraged to find placements in the sector they would like to work in.

## **LIST OF COURSES AND COURSE DESCRIPTIONS**

***Course Title, Course Name, (number of instructional hours),  
Course Description***

### **COAC 100 Professional Life Coaching (135 hours: 6 weeks)**

A life coach is an individual trained to help a variety of clients in the areas of self-improvement, relationships and family, education and employment, and leisure and community. Students will learn and practice coaching skills based on the eleven Core Competencies as defined by the International Coach Federation (ICF). Students will understand professional ethics, establishing agreements (contracts, guidelines, etc.), creating trust and mutual respect, and how to open and close a coach/client relationship. They will also learn

# Rhodes Wellness College

## Professional Integrative Nutrition Diploma

how to overcome obstacles in personal beliefs and thinking that prevent individuals from pursuing and achieving their goals.

Module One: Foundations in Coaching

Module Two: Coaching Relationships--creating trust and holding presence

Module Three: Effective Communication

Module Four: Facilitating Learning and Achieving Results

### **COAC 101 Life Skills Facilitation & Coaching (135 hours: 6 weeks)**

This course is designed to train students as life skills facilitators and coaches. Life Skills Facilitators and Coaches help groups large and small become highly functioning units in supporting unique goals of individuals in the group and group collective goals. Students will learn how to manage group dynamics and how to help groups problem solve. Students will learn how to identify their own coaching and facilitation skills and learn how to assess and improve individual engagement within groups. They will improve their personal presentation skills and understand how to positively influence behaviour. The skills and knowledge that students gain in this course will assist them in coaching both groups, organizations, and individuals.

Module 1: Creative Problem Solving

Module 2: Structured Human Relations Training

Module 3: Standards, Expectations, and Ethics

Module 4: Group Facilitation and Establishing Healthy Cultures Within Organizations

### **WELL 105 Physical Wellness (54 hours, 2 weeks and 2 days)**

In this course, students will be guided through an experiential process of listening to the signals from their body in a progressive and tactile way. This includes physical needs emotional responses in the body, the physical effects of exercise, and somatic awareness. Students will develop a 'Personal Physical Wellness Practice' designed to expand awareness and knowledge of their physical self. Students will learn to identify and link physical pain, muscle tension, and posture, with emotional and cognitive states, and understand how these states affect physical well-being. As students gain comfort with their physical self, they will explore new paths to physical wellness by changes they'd like to make establishing goals they'd like to achieve and implementing changes in their lives that will help them achieve those goals.

### **WELL 115 Wellness and Nutrition (13.5 hours: 3 days)**

This is an experiential course where students will learn the basics of whole foods nutrition, and how it relates to physical, mental, and emotional health. Students will record their current eating habits and create new meal plans based on whole foods nutrition and experience how a whole foods diet affects their wellbeing.

### **WELL 125 Spiritual Wellness (67.5 hours: 3 weeks)**

This course provides students with the opportunity to experience and cultivate a sense of spiritual well-being by engaging with diverse spiritual perspectives and practices. This will include mindfulness, meditation, life purpose exploration and transpersonal exercises. Students will have the opportunity to examine and articulate their own beliefs and worldviews about spiritual wellness and understand the diversity of this in others. Students will develop a 'Personal Spiritual Wellness Practice' designed to develop a deeper connection with their spiritual-self and spiritual wellbeing.

# Rhodes Wellness College

## Professional Integrative Nutrition Diploma

### **WELL 135 Emotional Wellness (67.5 hours: 3 weeks)**

This course is designed to introduce students to key elements that will support their emotional wellness. This includes facilitating emotional healing by helping students accurately identify feelings, self-responsibly express feelings, and identify and clear emotional trauma from their past. Students will be introduced to the underlying causes of emotionally driven behavior and will learn techniques for communicating and clearing emotions with others to create healthier interpersonal relationships. Students will learn that their emotional wellness is directly related to their ability to tolerate difficult and intense emotions such as anger, shame and fear, and their ability to experience a wide and diverse range of feelings and will gain valuable tools that will help them create an emotional wellness plan.

### **WELL 145 Mental Wellness (67.5 hours: 3 weeks)**

Using an experiential approach, students will learn how to identify the connection between beliefs, thoughts, feelings and behaviours and how to identify shifting cognitive patterns of thinking that are unhelpful to themselves or their clients. They will be introduced to Cognitive Behavioural Therapy (CBT), Dialectical Behaviour Therapy (DBT), Narrative Therapy and Nonviolent Communication as they apply each type of therapy to their own set of circumstances and observe their classmates doing the same.

### **NUTR 105 Nutrition and Mental Health (22.5 hours: 1 week)**

Students will develop an understanding of the mental-emotional connection to food, and how food can affect anxiety, depression, and general mental health.

### **WELL 200 Fundamentals of Wellness Counselling (45 hours: 2 weeks)**

In this course students will learn the foundational skills and knowledge for providing wellness counselling to individuals and groups utilizing a client-centered approach, in accordance to humanistic theory developed by Carl Rogers. Humanistic approaches in psychology emphasize the human capacity for integrity, creativity and autonomy. Students will learn the skills of attending behaviors, active listening, showing and utilizing empathy, asking powerful questions and creating strategically structured sessions. This foundation is critical for any wellness professional as it creates the infrastructure necessary for counsellors, nutritionists and coaches to support clients in their healing and wellness related objectives.

### **WELL 210 Wellness Counselling Theories and Practice (157.5 hours: 7 weeks )**

Students will examine the theories and techniques utilized by counsellors to facilitate physical, spiritual, emotional, and mental wellness. Having already experienced these techniques in WELL 110, WELL 120, WELL 130, and WELL 140, students will explore the theories that underpin the therapies they experienced. This class will be divided into four modules that correspond with each area of wellness. Students will delve deeply into each area, learning how to effectively apply the therapeutic techniques specific to each area of wellness.

#### **Module 1: Physical (Somatic Theories and Techniques)**

Specific areas of study will include Body awareness, body posture, and Bioenergetics. Somatic therapy and its value to help individuals that suffer physical symptoms from grief, post-traumatic stress disorder, and other trauma will be explored.

# Rhodes Wellness College

## Professional Integrative Nutrition Diploma

### **Module 2: Spiritual (Transpersonal Theories and Techniques)**

Students will learn the history and background of Transpersonal Therapy and how to apply the techniques of breathwork, meditation, contemplative practice, ritual and ceremony, and acts of service and gratitude to heal and improve the overall sense of well-being in individuals and groups.

### **Module 3: Emotional (Emotional Focused Theories and Techniques)**

Students will learn the history and background of Emotion Focused Therapy and the application of related techniques and approaches including, client-centered counselling techniques, unconditional positive regard, deferring-judgement, trauma repair, attachment-based techniques, stages of grief, and setting boundaries.

### **Module 4: Mental (Cognitive, Dialectical, and Narrative Theories and Techniques)**

Students will learn the history and background of the key cognitive therapies of Cognitive Behavioural Therapy (CBT) and Dialectical Behaviour Therapy (DBT). They will also learn how Narrative Therapy can provide new perspective by separating people from problems and help individuals rewrite their future through focusing on desired outcomes. Students will learn how to work with their clients to deconstruct cognitive distortions, change limiting beliefs, build distress tolerance, grow interpersonal effectiveness, and utilize autobiographical storytelling and other externalization techniques.

### **COUN 105 Theory, Principles & Applications in Addictions Treatment & Recovery (45 hours: 2 weeks)**

This course provides students with the skills necessary to identify the addictive process and to counsel clients in various stages of the process of change. The many forms of addictions will be examined, and the skills needed to assist clients will be demonstrated and practiced. The focus of the course is the development of a thorough understanding of the Stages of Change Model. The course will provide insight into the use and misuse of psychoactive drugs in the human body including information on neurobiology and pharmacology. Students are asked to identify their own habits/addictions and asked to examine what effects they may have on their lives, keeping a journal of their personal experience of withdrawal. This course provides theory and practice in methods of counselling in the process of recovery and rehabilitation. Self-regulation Theory, reduction of enabling behavior, and the appropriate/responsible use of intervention strategies will be examined.

### **NUTR 110 Fundamentals of Nutrition (67.5 hours: 3 weeks)**

Students will initially explore the fundamentals of nutrition including macro and micronutrients, vitamins, minerals, water and fats. They will develop an understanding of ingestion, digestion, and absorption, and how this relates to energy and health. A more in-depth look of how food relates to preventative health, with a special focus on the importance of food quality and how it effects the health and energy levels of the body, will be provided.

Studies will then turn to how food can be used to support health and act as a tool in preventative wellness. They will learn about supplements, introductory herbology, supplement and herb quality, and under which circumstances it's helpful to integrate supplements and herbs into a nutrition plan. Understanding

# Rhodes Wellness College

## Professional Integrative Nutrition Diploma

indications, contraindications, and how food, supplements, and herbs can interact with medications will be studied. Understanding the importance of working with professional health providers such as medical doctors and naturopathic doctors whenever recommending supplements or herbs or changes in diet will be stressed.

### **NUTR 115 Nutritional Assessment, Coaching, and Counselling (22.5 hours: 1 week)**

Learning how to assess clients and evaluate assessment forms is paramount in this program. Students will gain an understanding of how physiological status and symptoms related to nutrition can be used to assess clients, through skilled use of assessment tools and intake forms.

Students will also learn the role of a Health Coach and clearly understand the difference between coaching and counselling within the framework of nutrition and health coaching. They will learn how to interweave coaching and counselling in practice and how to utilize each in isolation. Students will gain experience discerning which tactic is most appropriate to use according to circumstantial need.

### **NUTR 125 Cooking with Whole Foods and Meal Planning (22.5 hours: 1 week)**

Students will learn how to prepare nourishing foods and will learn about the therapeutic benefits from preparing foods in a holistic fashion. They will learn the benefits of soaking, steaming, fermenting, sprouting, the pros and cons of different cooking methods and how to develop meal plans that support health; students will learn how to integrate this specialized food preparation into meal planning.

### **NUTR 130 Nutritional Sciences (90 hours: 4 weeks)**

Nutritional Sciences covers four major areas: (1) basic chemistry, (2) basic biology, (3) cellular biology, and (4) anatomy and physiology. Students will learn about basic atomic structures of food and how this relates to nutrition at a base chemical level. Students will be introduced to the fundamentals of biology as it relates to nutrition and will gain a basic cellular understanding of metabolism and its effect on the human body. Students will study what happens when cells don't react the way they should and how this can lead to disease. Students will develop a basic understanding of anatomy and physiology and the eleven systems of the body.

### **NUTR 140 Alternative and Comparative Diets and Weight Management (45 hours: 2 weeks)**

This course will look at different diets including the wisdom of traditional diets, the energetics of food, and will provide an understanding of various popular diets such as vegan, vegetarian, paleo, ketogenic, intermittent fasting, Atkins, raw, and other diets. Students will learn the elements of these diets and will learn how to discern the pros and cons of different diets. Weight loss and weight management and how this connects to mindful eating and creating healthy habits, including traditional physical assessment tools such as BMI, will be taught. This course involves group research, reports and class presentations.

### **PROF 100 Fieldwork and Supervision, Level 1 (22.5 hours: 1 week)**

Fieldwork and Supervision is about gaining experience—working with clients and working with a supervisor to refine skills as a nutritional counsellor. This course includes a minimum of 15 hours of client sessions (in individual or group settings). Students will be provided feedback and will be graded on their ability to

# Rhodes Wellness College

## Professional Integrative Nutrition Diploma

differentiate when they need to employ coaching tactics and when to employ consulting and educational tactics in their role as a Nutritional Counsellor.

### **NUTR 200 Lifecycle Nutrition (45 hours: 2 weeks)**

This course will develop an understanding of how nutritional needs change throughout an individual's lifecycle. Children's health issues and other issues related to age from pediatric needs to geriatric needs will be examined. The role nutrition can play in helping immunity, allergies, and various disabilities such as ADHD and common illnesses will be studied. Nutritional needs based on changes in hormonal balances will also be examined including how healthy nutrition habits can support individuals through pre-adolescent growth stages, puberty, menstrual cycles, prenatal, pregnancy, and postpartum stages, through menopause/andropause, and other life stages. This course will focus on how both preventative and supportive nutritional measures can be taken to help individuals optimize their health.

### **NUTR 205 Symptomatology (45 hours: 2 weeks)**

Students will gain a greater ability to provide nutritional assessments through understanding how nutritional deficiencies and excesses are the bases of illness and disease. Special attention will be given to the digestive system, pH balancing via acid/alkaline foods and integrating tests such as pH testing, and further understanding of endocrinology, immunity, allergies, inflammation, and autoimmunity will be developed. The importance of working with a client's medical team to support health and wellness in a legal and supportive manner will be demonstrated and explored. Students will continue to develop skills in utilizing evaluation techniques and utilizing assessment forms.

### **NUTR 210 Nutritional Pathophysiology (45 hours: 2 weeks)**

An understanding of how illness and disease, including chronic disease, develops in the body will be developed in this course. Students will learn nutritional protocols that can support the various body systems. An emphasis on scope of practice will be applied throughout this course so that students understand they cannot diagnose illness or disease and they cannot cure illness or disease. Students will learn the legal problems and liabilities they will face if they contravene this scope of practice, and they will learn how to effectively work with dietitians, medical doctors, naturopathic doctors, psychiatrists, and other members of the medical community. Students will gain a keen awareness of their role in helping their clients and organizations they work with to improve their health and sense of wellness, through nutrition.

### **NUTR 220 Overcoming Eating Disorders and Spiritual Dynamics (45 hours: 2 weeks)**

This course will build on the semester two and three wellness courses to develop a more advanced understanding of mental-emotional connections of food, and how and why food is misused in disordered eating. This course will also explore the connection of spiritual dynamics with nutrition, through the lens of the seven chakras utilized in eastern wellness techniques. Students will learn about spiritual anatomy and how it relates to nutrition, health and healing.

# Rhodes Wellness College

## Professional Integrative Nutrition Diploma

### **NUTR 230 Nutrition Habit Change and Motivational Interviewing (45 hours: 2 weeks)**

This is an advanced course that will provide students with more in-depth understanding of how psychology intermingles with nutrition when it comes to changing habits, creating commitment, and understanding choice related to diet. Students will build on their understanding of Cognitive Behavioural Therapy (CBT) as it relates to mindful eating habits. They will learn how to identify negative physical, emotional, and mental triggers surrounding nutrition and eating habits, and will develop skills to help individuals overcome trigger responses that lead to individuals failing in their nutritional goals. Students will learn and practice motivational interviewing with clients to help clients make successful and enduring changes in their eating plans.

### **PROF 200 Student Clinic and Supervision (45 hours: 2 weeks)**

Students will continue to build experience working with clients, groups and communities while working with a supervisor to refine their skills as a nutritional counsellor. This course includes a minimum of 30 hours of client sessions in either a group or individual setting.

### **NUTR 240 Eco Nutrition (45 hours: 2 weeks)**

In this course students learn how the environment affects the quality of the food we eat, and our health. Understanding the importance of soil quality, farming practices, the importance of local food production, and how pollution affects the quality of food will be learned. The effects of food transportation will be studied, and students will be taught how to integrate better environmental practices into nutrition. They will learn how eco-nutrition connects to mental, emotional and spiritual wellness.

### **NUTR 250 Legal Parameters, Ethics, and Professional Practice in Nutrition (45 hours, 2 weeks)**

An overview of Canadian Law as it relates to professional practice as an integrative nutritional counsellor will be provided. Students will develop a clear understanding of ethics as it relates to nutritional advising, their scope of practice, and ethical and legal limitations. Additionally, they will explore the professional opportunities in the exciting world of nutrition. They will learn about career options in the food industry, health care industry and wellness industry, as well as private practice. Students will receive employment counselling and will learn how to employ effective skills and resources to gain employment in areas and jobs they want to work in. Students will learn about basic business requirements including acquiring insurance, registering their business and creating realistic budgets that align with their goals.

### **PROF 210 Workshop Development and Leadership (45 hours, 2 weeks)**

Students learn how to identify organizations that need their help and will source an appropriate organization that they can deliver a nutrition workshop to. Students will work together, in groups, to develop a meaningful workshop that addresses a need provided by the organization they will work with. They then deliver the workshop, without charge. Students gather together after the workshops and develop reflection and further development skills to improve their ability to offer effective workshops in

# Rhodes Wellness College

## Professional Integrative Nutrition Diploma

the community. All students are guided by their faculty throughout this course to ensure efficacy in them applying the skills and knowledge they have gained to-date in this program.

### **NUTR 260 Sports and Performance Nutrition (45 hours, 2 weeks)**

Students will develop an understanding of the special needs of athletes. They will learn what foods best support general and intense physical exercise. Students will develop an understanding of traditional assessment tools in exercise such as Body Mass Index (BMI), and how to assess weight and wellness depending on physical fitness. A cross analysis of different sports-nutrition theories will be explored. Students will conduct research in the area of sport nutrition and give in-class group presentations.

### **NUT 280 Nutrition for Advanced Ages (45 hours, 2 weeks)**

The Nutrition for Advanced Ages course builds upon the basics of nutrition for the elderly learned in Lifecycle Nutrition (NUTR 200). Students explore the mental-emotional layer of the physical changes that the elderly face, including motivation and outlook of life as they age. Students will learn how to work with families, caregivers, and support groups to ensure their older clients receive the nutrition they need to remain motivated to actively participate in their health and happiness.

### **PROF 230 Professional Practice and Business (45 hours, 2 weeks)**

The course is a basic business course that will help students open their own private practice, in case they choose this route over working for an organization. Students will learn proven marketing and sales strategies for today's digital world. They will learn how to utilize cost-effective techniques to develop and deploy action plans that will help them with client acquisition and client retention.

### **PRAC 101 Supervised Practicum (120 hours: 6 weeks)**

Students can choose from a wide variety of practicum placements including holistic eateries, integrative pharmacies, fitness centers, integrative wellness clinics, nutrition and supplement stores, community centers, and more. Students are encouraged to find placements in the area of industry they would like to work in and are given support until they are able to secure a practicum. Rhodes Wellness College administration works directly with host organizations to ensure proper reporting of hours is performed and helpful feedback related to the student's performance is received. College administration will work with both the student and the place of practicum to ensure the relationship and experience is positive for both.

### **PRACTICUM REQUIREMENTS AND PROCEDURE**

Rhodes Wellness College will follow its already established Practicum policies and procedures that it practices for its other PTIB approved programs, which are detailed in Rhodes Wellness College's "Work Experience Policy ("Practicum")".

## Professional Integrative Nutrition Diploma

### **ADMISSIONS REQUIREMENTS**

Rhodes Wellness College is committed to enrolling students who meet program admission criteria and who are likely to succeed in achieving their education and career goals. For admission to Rhodes Wellness College's Professional Integrative Nutrition program, an applicant must meet the following criteria:

- Reach the age of majority (19 years old in British Columbia) or provide to the College the written consent from the applicant's parental/guardian consent.
- Submit a resume with two references.
- Demonstrate spoken and written proficiency in the English language consistent with the proficiency of a high school graduate, as – evidenced by a written personal statement and a one – on – one screening interview (see also the Language Proficiency Assessment Policy)
- Provide an International study permit/student visa, if applicable
- A minimum of 12 months prior sobriety is required to be verified during the interview. The College's representative may require the applicant to provide a letter to the College confirming the applicant's sobriety from a counselor.

Rhodes Wellness College reserves the right to deny any candidate admission into this program if admissions does not believe the applicant will be a potential fit or adequately benefit from taking the program.

### **ENGLISH LANGUAGE PROFICIENCY (ELP) REQUIREMENTS**

Rhodes Wellness College provides all its instruction in English. A student whose first language is not English must submit English proof that they will be able to sufficiently understand and communicate in English so that the student can fully participate in class and so that classmates can benefit from the student's insight and participation. Accordingly, one of the following Proof of English documents must be submitted in order to gain admission to Rhodes Wellness College for this program:

- Test of English as a Foreign Language (TOEFL) with a minimum score of 78 (internet-based).
- Canadian Academic English Language Assessment Test (CAEL) with a minimum score of 70.
- International English Language Testing IELTS (academic version) with a minimum score of 6.5 overall, and no one score less than 5.5.
- Alternative exams to the above may be accepted as Proof of English providing the exam is internationally recognized and has published official equivalencies to one of the above exams (TOEFL, CAEL, IELTS) and the student has achieved the equivalent scores consistent with what is required in the tests listed herein.
- Two years of high school where the language of instruction is English.
- Two completed full-time semesters at a post-secondary English-speaking institution.
